

# 1 GHz Line Extenders - 2PAC-C (RG)

Replaces/Upgrades ARRIS®/C-COR®  
550/625/750/870 MHz Systems

## Features:

- Specified bandwidth performance from 625 MHz up to 1 GHz
- Utilizes OEM 1 GHz style equalizers and JXP style pads
- Multiple options for return path bandwidth
- GaAs or GaN plug-in hybrid technology
- Plug-in diplex filter for future reverse split changes

The NEW 2PAC-C enhanced system amplifier module from Broadband International® is designed to drop into any existing ARRIS®/C-COR® E-Series Line Extender housing. The forward bandwidth is up to 1 GHz and may be optimized for any bandwidth from 625 MHz to 1 GHz. This is accomplished by alignment of the interstage response network and by the type of cable equalizers utilized. Performance may be optimized by the choice of GaAs or GaN hybrids to achieve different operating gains. The amplifier accepts any 1 GHz C-COR® style equalizer and JXP style pads.

**2PAC-C-COR Line Extenders for Upgrading/Replacing  
ARRIS®/C-COR® 625/750/870 MHz Systems**

The use of plug-in GaAs or GaN hybrids makes this system amplifier easier to service than the OEM models now offered utilizing surface-mounted gain blocks. The internal losses of our design have been minimized to provide the lowest possible RF distortions. The 2PAC-C-COR is designed as a drop-in solution for older 450 to 870 MHz systems.

The interstage EQ and Pad sets the output gain and slope for maximum performance. RF test points are provided at both input and output ports. The forward output RF test port may also be utilized as a reverse sweep input port with suitable RF sweep test equipment. All the test ports are directional couplers with a resistive pad to provide an accurate -20 dB reference level.

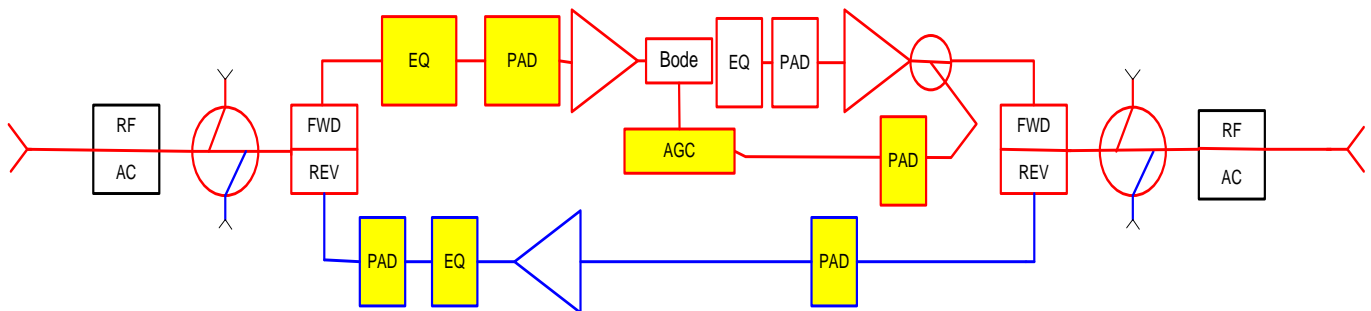

The diplex filters are plug in independent filters that can be changed in the field at a future date if a different reverse split is desired.

<b>2PAC-C (RG) LE Amplifier Conversion Performance to 1 GHz</b>				
<b>Analog Channels</b>	<b>79</b>	<b>95</b>	<b>110</b>	<b>Return</b>

## 2PAC-C Diagram and Ordering Information

The following Required Accessories highlighted in yellow must be ordered separately (all other pads and equalizers are provided)

The Broadband International® 2PAC-C amplifier can be configured in many different frequencies and options. Please consult your account representative for assistance with specific plug-in options.
