

Power Supply, Slimline Housing

For Scientific Atlanta® Slimline Housing and Broadband International® 6PAC-S Network Amplifiers

The Broadband International® power supply is backward compatible with all Scientific Atlanta® Slimline trunk housings. This modular power supply fits into the existing power supply location and will replace all OEM power supplies up to the Scientific Atlanta® model number 279660.

The 24 volt DC output provides up to 2.5 amperes of current and will operate from 40-90 AC volts.

The regulator is a fixed frequency switching regulator that allows for a superior power factor to the 40-90 volt input line. The power supply includes a fast acting electronic crowbar surge protector. The crowbar circuit activates at approximately 230 volts and will present a short circuit until the line voltage returns to a normal operating voltage of 90-40 volts.

OEM P/N	BBI P/N	Description
279660	227000	40-90 volts AC

Input Voltage	40-90 volts AC
Output Voltage	+24 Volts DC +/- .5 volts
DC output current at 24 volts DC	2.5 amperes MAX
Length	7.75 inches
Width	3.3 inches
Height	1.8 inches
